

# HydroMatrix

**Application of HYDROMATRIX specially designed membranes for the water treatment application and waste water treatment application.**

## **Pre-Treatment for Reverse Osmosis**

**HYDROMATRIX** UF Membranes highly recommended for the pre-treatment of reverse osmosis membranes from obstacle the fouling and it is a protection of mentioned below fouling and production loses also increase the membranes life and quality o f premate water.

- Colloidal Fouling
- Bacterial Fouling
- Chemical Fouling

## **Post Treatment of Waste Water**

**Hydromatrix** high quality membranes are highly suitable use for the post treatment of waste treated water recycling of water treated by waste water treatment plant. After treatment of waste water which can be use for the reverse osmosis system, Cooling towers or gradening or washing purpose.

## **Clean & Clear Water Provided**

**Hydromatrix** HMUF series membranes are high quality product specially designed for the treatment of high turbidity water, river water, canal water and drinking water filtration system to produce germ water for healthy environment.
